

GATE IIT X KGP Hustle House

The website has strong credibility signals — lots of toppers, many courses, experienced faculty, and counselling forms. But right now, the site feels overcrowded and difficult to navigate. Instead of guiding users toward enquiry or admission, it overwhelms them with too much information at once.

1. Homepage Feels Overloaded

Too many course cards, topper photos, and sections are shown immediately. Parents and students don't know where to focus.

This reduces clarity and increases bounce rate.

Fix: Simplify the homepage into:

- Hero
- Top Results
- Courses
- Faculty
- Testimonials
- Lead Form

Everything else can move to separate pages.

2. Weak Visual Hierarchy

Almost every section competes equally for attention using bright colors and dense layouts.

Users should instantly notice:

- top results
- counselling CTA
- best courses
- trust indicators

Fix: Use better spacing, cleaner typography, fewer colors, and larger section contrast.

3. Course Section is Difficult to Scan

The huge grid of courses looks chaotic on mobile and desktop.

This creates decision fatigue.

Fix: Categorize courses into:

- Engineering Exams
- Medical Exams
- School/Foundation
- Government Exams

Use clean cards with icons + short descriptions.

4. Trust Signals Are Not Structured Properly

The institute clearly has many achievers, but the presentation feels cluttered instead of premium.

Fix: Showcase:

- AIR ranks
 - top selections
 - student success stats
 - years of experience
- using clean stat cards and sliders.

5. Conversion Flow is Weak

The enquiry form appears too late and there's no sticky CTA guiding users throughout the page.

Fix: Add:

- sticky mobile counselling button
- WhatsApp CTA
- repeated "Book Free Counselling" sections
- shorter lead forms

SEO Opportunity

Students search terms like:

- "Best KCET coaching in Bangalore"
- "GATE coaching near me"
- "NEET coaching in Mysore"
- "IIT-JEE coaching institute"

Create dedicated landing pages for each exam/course/location combination to generate much higher-quality organic leads.
